

Using the Studio Tool in Canvas

What is Studio?

Studio is a tool for creating and managing video and audio content in Canvas.

What Can I Do With Studio?

- Record video and audio lectures on your computer and post them to your course
- Record with webcam, screen-capture or both
- Upload other media files to Canvas
- Add media to Pages, Discussions, Announcements, Modules, Assignments, Quizzes and anywhere else that you encounter the rich text editor
- Use Studio as a repository of content that you can use in multiple courses
- Embed videos from YouTube in Canvas
- Have text-based discussions in the timeline of an audio or video file
- Respond to comments that are posted by other users in the timeline
- Add audio and video responses in regular Canvas discussions
- Embed quiz questions in Studio videos and pass the grades to the Canvas grade center
- Edit and annotate media files – add overlays, insert text, draw on the screen etc.
- Share media with other users - does not have to be in a specific course
- See who watched a video and which sections of it they watched
- Closed-captioning - supports multiple languages
- Studio file storage is unlimited and does not count towards your course's 2gb storage limit

How Do I Access Studio?

All Canvas users have access to Studio. Your personal library is accessed from the Studio button in the global navigation menu. Instructors also have a Studio button in their course menus. All users can access Studio from the content editor.

Where Can I Get Training and Support?

- From the Help menu in Canvas select “Search the Canvas Guides” > click on ‘Guides’ menu at top of page > Select Studio from pop-up menu
- Visit Canvas support page at <https://canvas-support.emory.edu/canvas-resources/for-faculty/canvas-studio.html>
- Make an appointment with a TLT analyst at <https://tlt-emory.libcal.com/appointments/canvas>
- Contact 24/7 Canvas Support at 1-833-334-2835
- Email classes@emory.edu for assistance
