

VoiceThread

GETTING STARTED GUIDE

What is VoiceThread?

VoiceThread is a tool that enhances asynchronous interactions by enabling voice and video communication. It supports discussions, lectures, presentations, and group work by allowing users to incorporate audio, video, and other media.

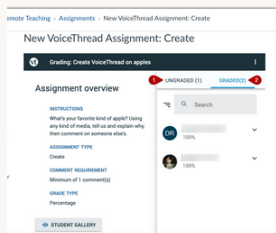

Features

- Create comments on content with text, audio, video
- Create short lectures with comments, audio, video and doodles
- Integrates with Canvas

Uses

- Asynchronous discussions with audio/video comments
- Introductions, icebreakers, and presentations
- Practice activities
- Personalized feedback
- Short video lectures
- Small group activities

Where Can I Access VoiceThread?

Access VoiceThread through Canvas. It can be added as an assignment with the the assignment settings.
